ABOUT

I am a skilled web developer and designer dedicated to expanding my expertise in the MERN stack (MongoDB, Express, React, and Node.js). With a strong foundation in front-end technologies like HTML, CSS, JavaScript, Bootstrap, and React, it allows for seamless, interactive experiences on both client and server sides. With a background in PHP and ASP.NET, the MERN stack allows for versatility across different web development frameworks. Passionate about growth and adapting to new trends, the MERN stack ensures projects align with industry standards.

EDUCATION

VAKHRIYA PJ HIGH SCHOOL, Kalol — HSC

Year 2021 - 2022

Ganpat University, Kherva — BCA

2024 Present

PROJECTS

Travel Site

[<https://khushal610.github.io/Ajay-modi-travels/>]

Built a travel website using HTML, CSS, JavaScript, and Bootstrap 5, focused on front-end design. Showcases destinations and packages with engaging visuals and interactive elements. Although static and not fully responsive, it demonstrates skill in structured layouts, Bootstrap styling, and JavaScript interactivity.

Spotify-Clone

[<https://spotify-clone-khushal610.netlify.app/>]

Created a Spotify-inspired React web app to front-end skills, emphasizing UI design, state management, and component-based architecture. It simulates Spotify's interface but is static and not fully responsive, showcasing React expertise and layout design in a single-page application structure.
